Certificate of Conformance

Turbine Support International, LLC. certifies that Jet Engine S/N 722386 was dismantled using approved tooling methods and practices. No parts were subject to excessive heat or immersed in corrosive liquid and were not involved in an incident or fire while in the possession of Turbine Support International, LLC. All maintenance disassembly was accomplished in accordance with the General Electric CFMI Manual.

The parts removed were identified and tagged in "As Removed" condition. The parts were removed from a CFM56-3 S/N 722386 owned by Avioserv San Diego and work performed was requested on Avioserv's disassembly Repair Order number (E1246). Engine has a Total Time 50,020 and Total Cycles 39,415. Times and cycles supplied by customer.
